Mac

Android

Product Introduction

M5 is a versatile plug-and-play one screen laptop monitor that's not only portable and foldable but also a quick ticket to your own on-the-go mobile studio. It's the perfect solution for laptop users looking for multi-screen sync or separate displays, boosting your work efficiency by up to 50% for some serious multitasking mojo. It's got the chops to sync up with models from Samsung, Huawei, and more. Plus, it supports smartphone mode, computer mode for laptops, audio/video transmission—you name it.

The M5 stand is incredibly easy to use. Gently pull the stand open to easily attach it to your computer monitor. It is suitable for 13 to 17.3-inch laptops, features adjustable viewing angles, and supports both landscape and portrait screen modes for various usage scenarios. It provides a unique and enjoyable experience for professionals, office workers, gamers, stock traders, entrepreneurs, programmers, and students.

The M5 screen can independently adjust brightness, sound, contrast, and other parameters. It is equipped with MINI HDMI/TYPE-C interfaces, allowing for multifunctional video expansion without the need for a docking station. As long as your laptop has a full-function TYPE-C interface, it can be directly connected to the display. Laptops, desktops, mini PCs, set-top boxes, and game consoles with HDMI output interfaces can be directly connected to the display, but the screen requires an external power source (you can use a type-c charging cable).

Finally, the M5 screen supports 192-degree rotation, allowing you to freely adjust to the best viewing angle based on your needs, providing an ultimate visual experience.

Connection Mode

1. Connect M5 with Laptop

TYPE-C Connection:

If your laptop has one full-featured Type-C port, you can use one USB-C to USB-C cable to connect the product to your laptop. Please connect the cable from the first or second port on the screen extender to the full-featured Type-C ports of your laptop.

USB and HDMI port Connection:

If your laptop has one USB-A or USB-C port and one HDMI port, please use two cables (one HDMI to TYPE-C cable + one USB-A or USB-C to USB-C cable) to connect the screen.

Note: The HDMI to MINI HDMI cable must be connected to the third port of the screen extender for video, and the USB-A or USB-C to USB-C cable must be connected to the first or second port for power supply.
Notide: If the display has no signal or the signal is unstable after connection, please connect an external 5V/2A power adapter to power the screen extender.

2. Connect M5 with Mobile Phone and Other Devices

Switch Connection Mode
(External power supply required)

Transportation, Storage and Safety Information

To ensure the safe and proper usage of this product and to prevent potential accidents such as electric shock or fire, it is essential to thoroughly read and comprehend all usage requirements and operational procedures before utilizing it. Kindly adhere strictly to the following guidelines:

1. The DC power supply required for this product is an AC/DC power adapter. Ensure it is positioned far away from heat sources and placed in a well-ventilated area. The AC power socket and AC power line must be properly grounded and capable of handling the necessary current demand.
2. The DC power input required for this product is 5V-20V±2V.
3. Take care to prevent excessive humidity and dust accumulation to avoid circuit corrosion and potential failures.
4. Avoid subjecting the screen to external forces.
5. Refrain from using sharp tools that may damage the screen.
6. This product is suitable for general business and domestic use, with a recommended ambient temperature ranging from -20°C to 60°C.
7. Remember to power off the device when not in use.
